

Brian Lagranda

Frontend Developer

Buenos Aires, Argentina · [linkedin.com/in/dev-brianlagranda](https://www.linkedin.com/in/dev-brianlagranda) · briandvlpr@gmail.com

Frontend Developer with 2+ years of experience building scalable and maintainable web applications using React, TypeScript, and TailwindCSS. Strong background in component-based architecture, global state management (Zustand, Redux), automated testing (Vitest), and modern UI design. Passionate about writing clean, accessible code and delivering smooth user experiences through continuous learning and modern frontend practices.

SKILLS

Technical

React · TypeScript · JavaScript (ES6+) · TailwindCSS · Zustand · Redux · HTML5 · CSS3
React Router · Git · GitHub · Vitest · REST APIs · Unit Testing · Responsive Design
Component-Based Architecture · Accessibility · Feature-Sliced Design · GitFlow

Soft skills

Problem Solving · Attention to Detail · Self-Learning · Communication · Collaboration
Time Management · Adaptability · Ownership · Passion for Clean Code

PROJECT EXPERIENCE

FinApp | Personal Finance Manager

[GitHub](https://github.com/brianlagranda/finapp): <https://github.com/brianlagranda/finapp>

May 2025 · React · TypeScript · Zustand · TailwindCSS · Vitest

- Built a modular and scalable architecture using Feature-Sliced Design.
- Integrated Zustand for global state with efficient reactive patterns.
- Created reusable and accessible UI components.
- Added unit tests with Vitest to ensure stability and prevent regressions.
- Focused on clean UX for managing income and expense transactions.

MultiStepForm | Dynamic Form Builder

[GitHub](https://github.com/brianlagranda/multistepform): <https://github.com/brianlagranda/multistepform>

[Deploy](https://multi-step-form-psi-wine.vercel.app/): <https://multi-step-form-psi-wine.vercel.app/>

July 2024 · React · TypeScript · Redux · TailwindCSS

- Developed dynamic navigation between form steps with React hooks.
- Managed validation and state transitions using Redux.
- Reduced unnecessary re-renders, improving form responsiveness.
- Designed a clean and responsive UI for smooth user flow.

Calculator | Responsive Calculation App

[GitHub](https://github.com/brianlagranda/calculator): <https://github.com/brianlagranda/calculator>

[Deploy](https://calculator-chi-opal.vercel.app/): <https://calculator-chi-opal.vercel.app/>

January 2024 · React · TypeScript · TailwindCSS

- Built a user-friendly, mobile-first calculator UI with TailwindCSS.
- Improved event handling and input accuracy using React state.
- Ensured responsive design and accessibility for all device sizes.

Technological E-Commerce

[GitHub](https://github.com/brianlagranda/tecnological): <https://github.com/brianlagranda/tecnological>

[Deploy](https://tecnological.vercel.app/): <https://tecnological.vercel.app/>

December 2023 · React · JavaScript · React Router · TailwindCSS

- Developed a basic e-commerce interface with routing via React Router.
- Styled reusable components with TailwindCSS for visual consistency.
- Delivered a responsive and fast frontend experience.

EDUCATION

UNIVERSITY OF HELSINKI · Full Stack Developer · 2023

[Certificate](https://drive.google.com/file/d/1uS7bGK7pQ3nLXAF7Vu4hECGvN0iCTpvN/view): <https://drive.google.com/file/d/1uS7bGK7pQ3nLXAF7Vu4hECGvN0iCTpvN/view>

CODERHOUSE · Front End React Developer · (2023, complementary course)

[Certificate](https://drive.google.com/file/d/13INT5OQ51iILnIFjE6XR8F-bWgXwbXH/view): <https://drive.google.com/file/d/13INT5OQ51iILnIFjE6XR8F-bWgXwbXH/view>
